Leader Across All Ambulatory Verticals

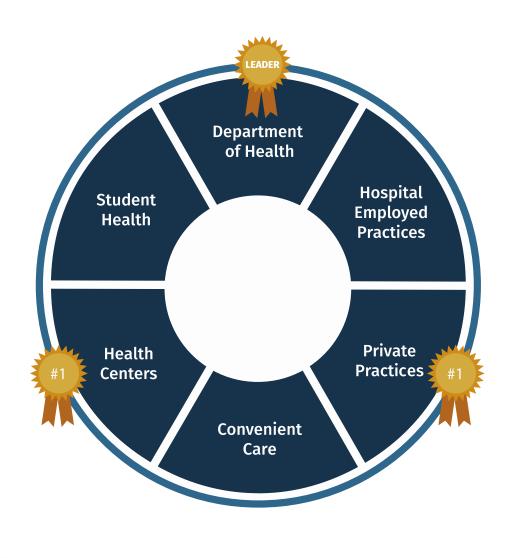

eClinicalWorks

Our overall mission continues to be to innovate and to make tomorrow better than today.

We look at innovating in terms of our products and services that -

- 1) Meet new needs
- 2) Meet needs that are sometimes not articulated or defined yet
- 3) Transform ways of doing old things in new ways

With one, unified product and its flexible nature we are able to serve a broad range of outpatient verticals.

Specialties

eClinicalWorks comes with a robust multi-specialty database that supports more than 50 specialties.

Documentation formats include:

- SOAP Note
- OB Flowsheets
- Dental & periodontal exam/charting
- Orthopedic exam
- Vision exam
- Audiology exam
- Intervention Note
- Surgical Note
- Telephone/Web Encounter

Subset of specialties supported by eClinicalWorks

Allergy Immunology	Nutrition
Behavioral Health	Oncology (Hematology)
Breast Surgery	Ophthalmology
Cardiology	Orthopedics (PTPM, Sports, Physical Med)
Cardiothoracic surgery	Pediatrics
Dermatology (with MOHS)	Physical Therapy & Pain Management

- Manage program enrollment and program-specific care team assignments
- Document intake questionnaires and other assessments before creating treatment plans
- Allow users to define patient-specific problems, goals, objectives, and interventions, and track goal progress
- Manage scheduling and documentation of group visit

Beyond the Practice Wallsthe Care Continuum

eClinicalWorks

Interoperability . . .

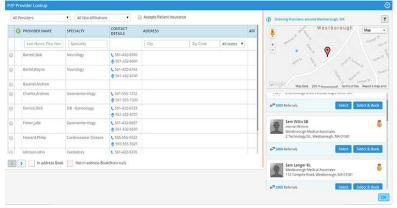

The ability to extend your reach beyond the practice walls and engage the patient's care continuum is an expectation – and interoperability solutions at eClinicalWorks make this possible.

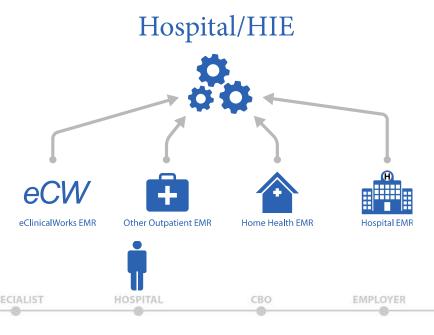

Interoperability solutions give you the tools needed to connect with the healthcare ecosystem as patients move between care settings.

eClinicalWorks gives you the ability to:

- Develop and/or strengthen local and regional affiliations with other providers and hospitals
- Establish a closed-loop private referral network of specialists
- Connect to local hospitals for orders, results, discharge summaries, etc.
- Provide efficient post-discharge/post operative follow-up care

Patient Portal

The Patient Portal provides a secure communication channel between providers and patients, allowing patients to be proactive in the management of their own health. Patients can review their personal health records (PHRs), view lab results, ask questions, or request prescription refills, referrals, and education materials. Your patients can also access their PHR, and more, through the healow app for iOS and Android platforms.

Portal notification – Messenger sends reminders, practice notifications, and more to your patients' secure Patient Portal account

App notification – The healow app can reach patients day and night, at home, at work, and everywhere in between – leverage smartphone technology to engage your patients wherever they are!

Email – General information (non-PHI) can be sent to patients using their email account, including links to helpful attachments

SMS Text messages – Patients of all ages are using text messaging to stay connected – Messenger's two-way text messaging capability can be used to remind patients of appointments, wellness activities, office hours, and more

Voice messages – Patients receive interactive, personalized voice messages from your practice and respond using their telephone keypad, automatically updating information in the EMR schedule

Workplace Health and Regulatory Compliance

Employers require access to patient records to ensure that each employee has the appropriate clinical assessments performed at the regularly scheduled intervals.

This visibility ensures compliance with OSHA regulations as well as with other industry requirements.

Employee physical exams and drug screenings are other areas where employers need reporting in order to monitor the compliance status of their employees.

The Employer Portal also provides access for bill payment for employee visits to the medical facility for standard assessments, preventive care, and urgent care.

See how eClinicalWorks helps patients navigate the entire healthcare continuum

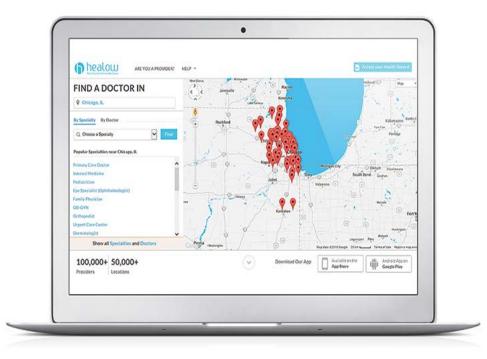

Find a Doctor in...

eClinicalWorks

Patients can use healow.com to find the right care, at the right location, and at the right time.

healow.com gives patients the ability to search for local providers based on proximity to their home or work, by specialty, or by first available appointment.

healow.com provides information on the physicians listed, such as languages spoken, education, hospital affiliations, and insurances accepted.

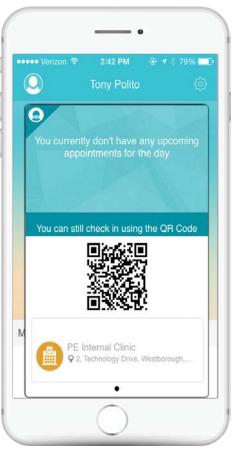

Streamline the Check-In Process

eClinicalWorks

When the patient arrives at the facility, provide them with an efficient check-in experience...

In addition to an appointment confirmation, the patient will receive a QR Code that can be used for a smooth check-in.

Similar to an airline boarding pass, your patients can check-in using the healow app or a printed confirmation page.

Kiosk-Self Service Check in

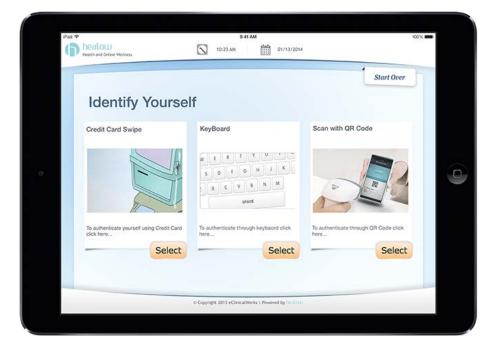

eClinicalWorks

The Kiosk streamlines the check-in process even more-and provides added, integrated functionality as well

Using the kiosk, patients can:

- Pay their co-payment
- Update demographic information
- Check insurance eligibility
- Complete practice questionnaires
- Sign consent forms

The Kiosk brings increased efficiency to your front office and allows your staff to assist patients who need their attention.

Documentation- Your Way!

Scribe is available on eClinicalWorks, eClinicalMobile on a smart phone, and eClinicalTouch, our native iPad app.

When providers dictate a note, Scribe automatically places the content within the appropriate sections of the Progress Note, creating a professional Progress Note with a click of a button –

"Scribe It"!

This native iPad app has the look and feel that iOS users expect combined with anytime, anywhere availability and integration with Scribe. eClinicalWorks comes pre-loaded with hundreds of templates that use structured data to create a complete and comprehensive progress note.

Ease of completion and robust content result in a well-documented visit that

- Gives the patient a clear understanding of the visit
- Creates a comprehensive encounter note for referrals
- Supports higher reimbursement

Patient Engagement

Patient engagement doesn't stop when the patient leaves the office!

Your patients can stay connected to your providers after they leave the office with the healow | health and online wellness mobile health app.

Tech-savvy patients are adopting wearable devices at a rate of around 20% and growing, according to a recent PricewaterhouseCoopers survey. And healow is ready with seamless integration with wearables that brings the data directly into the EMR.

Time To Take lisinopril 10:15 AM

Increased patient satisfaction, increased compliance, and increased efficiency . . . a win-win for you and your patients

Send automated reminders to patients to increase their level of satisfaction and compliance and reduce the number of "no shows", late arrivals, and open appointment slots

- Appointment reminders
- Medication reminders
- Health maintenance reminders
- Campaigns such as flu shots, immunization, clinics, blood pressure checks

Δ

Scheduled medication reminders help patients achieve compliance with their medications and improve outcomes -schedule the reminders once and they are automatically delivered to the patient on the healow app or Apple Watch™

Telehealth – the New Frontier

eClinicalWorks

- Televisits are integrated into the EMR for a smooth workflow
- Information submitted or conveyed by the patient can be directly imported into their EMR record
- Televisits can be used in several ways to enhance the patient experience and give them the care they need – where and when they need it

B2B – Business-to-Business model connects patients to specialists that you have on-call or scheduled for televisits

B2C – Business-to-Consumer can be used if you have Care Coordinators or Nurse Care Managers who interact with patients to help them manage complex and chronic conditions

Reimbursement for telehealth visits is now allowable by most major payers and billing and claim creation for televisits is an integrated part of the eClinicalWorks unified EMR/PM solution.
